BTL 8 ECG

Meet the World's Fastest ECG

10 Seconds
Printing Time

AI
Artificial Intelligence Interpretation

900 Reports
Batery Capacity for Printing

2 mins

The Fastest Possible Recording

Thanks to easy-to-use operations, accurate diagnostics based on artificial intelligence and instant printing or Wi-Fi sharing, BTL 8 ECG saves your time during ECG examination.

BTL 8 ECG

Speed Up Your Daily Routine

Artificial Intelligence

Automatic interpretation is extended by artificial intelligence algorithms trained on tens of thousands examinations.

Fast Performance

Instant automated export of examination or ECG report printed with guaranteed fast performance in every moment.

BTL 8 ECG

- AI Interpretation
- Diagnostic display
- Remote control
- Export to HIS
- Barcode reader
- User login via RFID
- Active directory users

Exceptional Capacity

The BTL 8 enables over 900 of the printed reports per single charge and stores 3 500 examinations.

Remote Control

Innovative remote control indicates electrodes contact and initiates recording from extended distance.

Faster

74%
Lower Costs

Heart matters.
Without compromises!

Artificial Intelligence

BTL 4 uses an artificial intelligence algorithm trained on tens of thousands of real patient records to achieve the highest accuracy.

Speed

Fast print, user friendly environment and optional vacuum electrodes shorten examination time by 24%.

Flexibility

Use office printer to save 74% of operational cost or achieve electronically via BTL CardioPoint.
